MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Investment Objectives and Strategies

The fundamental objectives of the Sun Life Amundi Emerging Markets Debt Fund (the "Fund") are to achieve total return comprised of a combination of interest income and capital growth by investing primarily in debt securities issued by governmental and corporate issuers located in emerging market countries throughout the world.

The Fund's sub-advisor is Amundi Canada Inc. ("Amundi Canada") and the Fund's commodity futures portfolio advisor is Amundi (UK) Limited ("Amundi"). In pursuing the Fund's investment objective, the sub-advisor invests primarily in debt securities issued by governmental issuers located in emerging markets throughout Latin America, Africa, Central and Eastern Europe (including Russia) Asia and the Middle East. They may invest a portion of the Fund's assets in debt securities of corporate issuers in the regions listed above. The Fund seeks to invest in a portfolio of primarily investment grade securities (BBB- or above), although a portion of the Fund may be in securities of any grade.

Risk

There were no changes in the Fund's investment objectives or strategies during the period which materially impacted the overall level of risk in the Fund. The risks associated with investing in the Fund remain as outlined in the Fund's Simplified Prospectus.

As at December 31, 2023, the majority of the Fund's investments are considered readily realizable and highly liquid; therefore, the Fund's liquidity risk is considered minimal.

Results of Operations

During the period, the net asset value of the Fund decreased from \$28.1 million to \$24.2 million due to negative net sales, partially offset by positive performance.

During the period, the Fund returned 10.1% for Series A securities, this result surpassed the Fund's blended benchmark, 50.0% J.P. Morgan Government Bond Index Emerging Markets (GBI-EM) Global Diversified Composite Unhedged C\$ Index, 50.0% J.P. Morgan Emerging Markets Bond Index (EMBI) Global Diversified Composite Index C\$, which returned 8.9%. The broad-based index, Bloomberg Barclays Global Aggregate Bond Index C\$, returned 2.9%. We have included the returns of the broad-based index to help you understand how the Fund performed compared to the general market. We have also included the returns for the Fund's blended benchmark, which more closely reflects the market sectors and/or asset classes in which the Fund invests, to provide another comparison to the performance of the Fund. Please refer to the 'Past Performance' section of this report for performance of each series.

The Fund outperformed its broad-based index during the reporting period due to an overweight allocation to emerging market bonds. Emerging market bonds outperformed global bonds during the period.

Fixed income markets were eventful over the period and included one of the most extreme whipsaws in fixed income since the beginning of the COVID pandemic. In the first half of the year, the Canadian economy was more resilient than many expected with GDP growth numbers coming in ahead of consensus expectations, fueled by a recovery in household spending. A key factor in this stronger-than-expected economic growth has been a resilient labour market. In the second half of the year, the effects of tighter monetary policy started to make an impact in slowing the Canadian economy.

In the third quarter, bonds sold off aggressively triggered by hawkish guidance from the U.S. Federal Reserve Board (the "Fed") that another interest rate hike was possible before the end of the year. Market sentiment then shifted in November with the Fed changing its tone on the direction of interest rates with the timing of potential rate cuts in 2024. This dovish guidance from the Fed caused government bond yields to decline and spurred a rally in fixed income through the remainder of the year.

Sun Life Amundi Emerging Markets Debt Fund

Against this macroeconomic backdrop, the Canadian fixed income market rebounded over the period after suffering the worst year in four decades. Returns in the first half of the year were driven by falling long-term government bond yields and narrowing credit spreads after spiking in March because of the various banking crises that emerged. Returns in the latter half of the year were driven by the change in expectations for the path of interest rates. Bond yields fell across the entire yield curve and credit spreads declined sharply. Corporate bonds outperformed government bonds over the period.

The Bank of Canada remains concerned about the corrosive effects of high inflation and raised its benchmark interest rate by a cumulative 0.70 percentage points ending the period at 5.0%. Meanwhile, the Fed raised interest rates by a cumulative 0.75 percentage points ending the period at 5.5%. While inflation remains high, tightening monetary policy by central banks has helped slow the rate of inflation globally. While the rate of inflation in goods has declined, services inflation remains high across most regions in the world with wages being the biggest driver.

A spread is the difference in yield between a Treasury bond and another debt security of the same maturity but different credit quality. Investment grade bonds are the highest quality bonds as determined by a credit rating agency. High yield bonds are more speculative, with a credit rating below investment grade bonds. Emerging market (EM) bonds saw negative returns. EM corporate bonds were more resilient than EM sovereign bonds. Sovereign bonds are debt securities issued by a national government to finance government spending.

Allocation to emerging market hard currency government bonds contributed to performance. Emerging market hard currency government bonds outperformed during the period due to interest rate cuts and lower inflation. An overweight position to Colombia local currency bonds contributed to performance. Colombia local currency bonds outperformed due to attractive valuations and interest rate cut. An allocation to Venezuela bond contributed to performance. Venezuela bond outperformed due to easing of sanctions and the end of the ban on bond trading.

An underweight position to Hungary local currency bonds detracted from performance. The central bank of Hungary started reducing interest rates leading to outperformance. An underweight exposure to Polish and Mexican local currency bonds detracted from performance. Polish and Mexican local currency bonds outperformed other emerging market bonds during the period.

Recent Developments

The composition of the Fund's independent review committee ("IRC") changed during the period. André Fok Kam completed his term and Ann David was appointed effective July 1, 2023.

Global tensions and conflicts within some geographic regions, such as the ongoing military conflict in Ukraine, have continued to impact global markets and economies. In addition, there continues to be tensions between larger nations over a number of issues, including trade, technology, human rights, and sovereignty. These issues have, in some cases, resulted in government sanctions and trade restrictions. These global tensions and regional conflicts, documented in the media, create a more challenging operating environment. The longer-term impact to geopolitical norms, supply chains and investment valuations is uncertain. The Manager continues to watch for developments and assess the impact to investment strategies.

Related Party Transactions

SLGI Asset Management Inc. is the manager, trustee and portfolio manager of the Fund. For its services, the Manager receives a management fee that is calculated as a percentage of the average net asset value of the Fund. This fee is calculated daily and payable monthly.

The Manager is responsible for the provision of all general management and administrative services required by the Fund in its day-to-day operations, including providing or arranging for the provision of investment advice, bookkeeping, recordkeeping and other administrative services for the Fund.

As trustee, the Manager holds legal title to the Fund's investments in trust for securityholders.

As portfolio manager, the Manager is responsible for managing the investment portfolio of the Fund directly or through sub-advisors. The Manager has retained Amundi Canada Inc. to act as the sub-advisor for the Fund in respect of the Fund's securities portfolio. Amundi Canada Inc. has in turn engaged its affiliate Amundi (UK) Limited to provide investment advisory services to the Fund. The Manager has also retained Amundi to provide commodity futures services with respect to the Fund.

The Fund may have direct or indirect holdings in Sun Life Financial Inc. or its affiliates or other funds managed by the Manager or its affiliates. Funds managed by the Manager, or its affiliates, may invest in securities of the Fund.

Sun Life Amundi Emerging Markets Debt Fund

The Manager has a distribution agreement with Sun Life Financial Investment Services (Canada) Inc. (the “Dealer”), a company under common control, under which the Dealer may distribute securities of the funds offered by the Manager in the jurisdictions in which the Dealer is so authorized.

Fund Administrative Expenses

The Manager pays certain operating expenses of the Fund (the “Administration Expenses”) in return for a fixed administration fee paid to the Manager by the Fund (“Administration Fee”). The Administration Fee is based on the net asset value of each series of securities of the Fund. The Administration Expenses include, but are not limited to, record keeper fees, accounting, audit and legal fees, bank and interest charges, safekeeping and custodial fees, taxes, administrative and systems costs, costs of reports to investors, prospectuses and other disclosure documents, regulatory filing fees (including any regulatory fees and expenses payable by the Manager) and trustee fees for registered plans. The amount of this charge is disclosed as Fixed annual administration fees in the Fund’s Statements of Comprehensive Income found in the annual financial statements.

The Fund also pays certain operating expenses directly (the “Fund Costs”). Fund Costs include: borrowing costs incurred by the Fund from time to time; costs in connection with portfolio transactions; fees and expenses payable to or in connection with the IRC; taxes payable by the Fund; contingent fees for foreign tax reclaim filings; and the costs of complying with any new regulatory or legal requirement imposed on the Fund. The Fund allocates Fund Costs proportionately among each series of securities of the Fund to which they apply. The Fund Costs that are specific to a series of securities are allocated to that series. These amounts are paid out of the assets attributed to each series of securities of the Fund, which reduces the return you may receive.

Fees and expenses payable to or in connection with the IRC are allocated to the fund and series to which they apply in a manner that, in the Manager’s view, is considered fair and reasonable. The amounts of these charges are disclosed in the line item “Independent review committee fees” in the Fund’s Statements of Comprehensive Income (Loss).

⁽¹⁾ This information is provided as at December 31 of the period shown, as applicable.

⁽²⁾ Management expense ratio is based on total expenses (excluding broker commissions and other portfolio transaction costs) including the Fund's allocated percentage of Fund-on-Funds' expenses for the stated period and is expressed as an annualized percentage of daily average Net Asset Value during the period.

⁽³⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average Net Asset Value during the period.

⁽⁴⁾ The Fund's portfolio turnover ratio indicates how actively the Fund's portfolio manager manages its portfolio investments. A portfolio turnover ratio of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a Fund's portfolio turnover ratio in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high portfolio turnover rate and the performance of the Fund.

Management Fees

The maximum annual management fee paid by the Fund is a percentage of the average daily net asset value of each series of securities of the Fund exclusive of any applicable taxes and operating expenses, which is accrued daily and is paid to the Manager monthly in arrears. Management fees pay for portfolio and investment advisory services, oversight of any service providers, marketing and promotional activities, arranging for the distribution and sale of securities of the Fund, general administration of Fund operations and sales and trailing commissions paid to dealers.

Sun Life Amundi Emerging Markets Debt Fund

The percentages and major services paid for out of the management fees are set out below:

	Maximum Annual Management Fee Rate (%)	As a Percentage of Management Fees	
		Dealer Compensation (%) ^(*)	General Administration, Investment Advice and Profit (%)
Series A Securities	1.70	43	57
Series F Securities	0.85	-	100
Series I Securities ^(#)	-	-	100
Series IS Securities	0.75	-	100

(*) Includes sales and trailing commissions.

(#) Series I management fees are not paid by the Fund. Series I investors negotiate management fees and pay directly to the Manager.

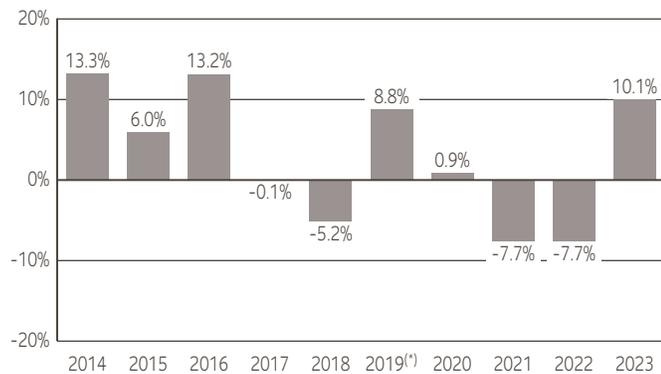

Past Performance

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemption, distribution, other optional charges or income tax payable by any securityholder that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

Year-by-Year Returns

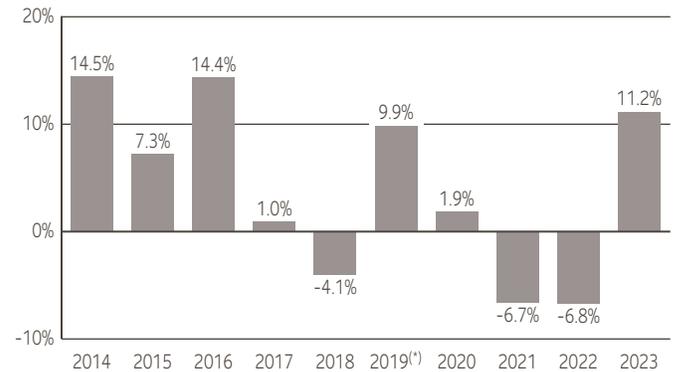

The following bar chart shows the Fund's annual performance for the period shown. The chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.

INDEX DESCRIPTION(S)

J.P. Morgan Government Bond Index Emerging Markets (GBI-EM) Global Diversified Composite Unhedged C\$ Index is a market capitalization weighted comprehensive global emerging markets index of local government bond debt. The index has a diversification overlay which limits the maximum weight per country to 10%. This index is not hedged to the Canadian dollar.

J.P. Morgan Emerging Markets Bond Index (EMBI) Global Diversified Index C\$ is an Emerging Markets sovereign bond index denominated in USD. The index limits weights of countries by only including a specified portion of those countries' eligible current face amounts of debt outstanding.

The Bloomberg Barclays Global Aggregate Bond Index C\$ measures the performance of the global investment-grade fixed-rate debt markets. It is composed of government, government-related and corporate bonds, as well as asset-backed, mortgage-backed and commercial mortgage-backed securities from both developed and emerging markets issuers.

Forward-Looking Statements

This management report of fund performance may contain forward-looking statements about the Fund, including its strategies, results of operations, performance and condition. Forward-looking statements include statements that are predictive in nature, or that depend upon or refer to future events or conditions. They are based on current beliefs, expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and various economic factors. Many factors could cause the Fund's actual results, performance or achievements to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. These factors could include, among other things, general economic, political and market factors, including interest and foreign exchange rates, business competition, technological changes, changes in government regulations or in tax laws and pandemics. Although the forward-looking statements contained in this report are based upon what management currently believes to be reasonable assumptions, the Manager cannot assure current or prospective investors that actual results, performance or achievements will be consistent with these forward-looking statements. The words "may", "could", "would", "should", "believe", "plan", "anticipate", "expect", "intend", "forecast", "objective", and similar expressions are intended to identify forward-looking statements. The Manager does not undertake any obligation to update or revise any forward-looking statements to reflect events or circumstances after the date of this document or to reflect new information or the occurrence of unanticipated events, except as required by law.
