MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Results of Operations

During the period, the net asset value of the Sun Life Milestone 2030 Fund (the "Fund") decreased from \$60.5 million to \$55.2 million due to negative net sales, as well as negative performance.

During the period, the Fund returned -0.2% for Series A securities, this result lagged the Fund's blended benchmark, 93.9% FTSE Canada Universe Bond Index, 6.1% MSCI AC World Index Local Currency Index C\$, which returned 0.4%. The broad-based index, FTSE Canada Universe Bond Index, returned -0.4%. We have included the returns of the broad-based index to help you understand how the Fund performed compared to the general market. We have also included the returns for the Fund's blended benchmark, which more closely reflects the market sectors and/or asset classes in which the Fund invests, to provide another comparison to the performance of the Fund. Please refer to the 'Past Performance' section of this report for performance of each series of securities of the Fund.

The Fund outperformed its broad-based index due to the Fund's allocation to equities. Equities outperformed bonds during the period.

During the reporting period, global stock markets advanced amid a resilient U.S. economy and the ongoing enthusiasm around artificial intelligence. The general expectation of interest rate cuts also contributed to the market rally despite the slower pace of cuts relative to what the market had hoped for at the turn of this year. The US stock market advanced during the reporting period, supported by well-received corporate earnings and ongoing expectations of rate cuts later in the year. In Europe, the financial markets posted a strong gain and economic momentum remained positive as the effects of the cost-of-living shock continued to abate. The consequence of the continued economic growth was sticky inflation. Investors' worries of an overheated economy proved overdone in Q1, but services inflation remained above levels that are consistent with central bank targets.

Against this resilient backdrop, developed market equities delivered positive total returns. These returns were concentrated in larger companies, while rate sensitive small cap stocks and Real Estate Investment Trusts (REITS) suffered from confirmation of the higher-for-longer interest rate environment. The Information Technology sector led the charge amid ongoing optimism over demand for AI-related technologies. Other top gaining sectors included Financials, Consumer Discretionary and Industrials. Improvements in the economic outlook boosted more economically sensitive stocks while banks were supported by some announcements of improvements to shareholder returns. Utilities, Consumer Staples and Real Estate were the main laggards. The Chinese stocks ended the first half of the year positive as foreign investors remained cautious about the state of China's post-pandemic economic recovery.

The beginning of 2024 saw a significant shift in the outlook of inflation and interest rate expectations. Initially, the fixed income markets anticipated faster central bank action to lower interest rates. However, expectations were scaled back as inflation remained elevated in major economies like the U.S and the Eurozone. Both the regions initially reported inflation rates exceeding forecasts, raising alarms about the enduring nature of service sector inflation.

During the period, Bank of Japan was an exception among developed economies as it increased interest rates for the first time in 17 years, signalling an end to negative interest rates. While most central banks remained cautious initially, the Swiss National Bank was the first to cut interest rates. While the Federal Reserve kept rates unchanged, the Bank of Canada (the "BOC") cut its overnight interest rates to 4.75%, down from 5%. The European Central Bank (the "ECB") also reduced interest rates in June as inflation declined significantly during the first half of the year and economic data began to show weakness. Bond yields dropped in response to the interest rate cut by the BOC and the ECB leading to positive returns.

Sun Life Milestone 2030 Fund

Across Emerging Markets, fixed income returns from hard currency and local currency bonds were positive for the period and outperformed. Emerging markets central banks led with interest cuts as they benefitted from lower levels of inflation compared to developed economies. High yield bonds outperformed investment grade bonds during the period. Investment grade bonds are the highest quality bonds as determined by a credit rating agency; high yield bonds are more speculative, with a credit rating below investment grade. Strong U.S. economic growth and lower default rates helped high yield bonds to outperform.

Allocation to bonds detracted from performance. During the period, longer maturity bonds underperformed due to higher duration. Duration is a measure of price sensitivity to changes in interest rates. The shorter the duration, the less bond prices drop as bond yields rise.

Global equity market performance was positive for the period. An allocation to equities contributed to performance.

Recent Developments

Global tensions and conflicts within some geographic regions, such as the ongoing military conflict in Ukraine, have continued to impact global markets and economies. In addition, there continue to be tensions between larger nations over a number of issues, including trade, technology, human rights, and sovereignty. These issues have, in some cases, resulted in government sanctions and trade restrictions. These global tensions and regional conflicts, documented in the media, create a more challenging operating environment. The longer-term impact to geopolitical norms, supply chains and investment valuations is uncertain. The Manager continues to watch for developments and assess the impact to investment strategies.

Related Party Transactions

SLGI Asset Management Inc. is the manager, trustee and portfolio manager of the Fund. For its services, the Manager receives a management fee that is calculated as a percentage of the average net asset value of the Fund. This fee is calculated daily and payable monthly.

The Manager is responsible for the provision of all general management and administrative services required by the Fund in its day-to-day operations, including providing or arranging for the provision of investment advice, bookkeeping, recordkeeping and other administrative services for the Fund.

As trustee, the Manager holds legal title to the Fund's investments in trust for securityholders.

As portfolio manager, the Manager is responsible for managing the investment portfolio of the Fund directly or through sub-advisors. The Manager has retained Sun Life Capital Management (Canada) Inc. ("SLC Management"), an affiliate of the Manager, to act as a sub-advisor for the Fund.

The Fund may have direct or indirect holdings in Sun Life Financial Inc. or its affiliates or other funds managed by the Manager or its affiliates. Funds managed by the Manager, or its affiliates, may invest in securities of the Fund.

The Manager has a distribution agreement with Sun Life Financial Investment Services (Canada) Inc. (the "Dealer"), a company under common control, under which the Dealer may distribute securities of the funds offered by the Manager in the jurisdictions in which the Dealer is so authorized.

SLC Management is an indirect wholly owned subsidiary of Sun Life Financial Inc.

Fund Administrative Expenses

The Manager pays certain operating expenses of the Fund (the "Administration Expenses") in return for a fixed administration fee paid to the Manager by the Fund ("Administration Fee"). The Administration Fee is based on the net asset value of each series of securities of the Fund. The Administration Expenses include, but are not limited to, record keeper fees, accounting, audit and legal fees, bank and interest charges, safekeeping and custodial fees, taxes, administrative and systems costs, costs of reports to investors, prospectuses and other disclosure documents, regulatory filing fees (including those incurred by the Manager) and trustee fees for registered plans. The amount of this charge is disclosed as Fixed annual administration fees in the Fund's Statements of Comprehensive Income found in the semi-annual financial statements (unaudited).

The Fund also pays certain operating expenses directly (the "Fund Costs"). Fund Costs include: borrowing costs incurred by the Fund from time to time; costs in connection with portfolio transactions; fees and expenses payable to or in connection with the Independent Review Committee ("IRC"); taxes payable by the Fund; contingent fees for foreign tax reclaim filings; and the costs of complying with any new regulatory or legal requirement imposed on the Fund. The Fund allocates Fund Costs proportionately among each series of securities of the Fund to which they apply. The Fund Costs that are specific to a series of securities are allocated to that series. These amounts are paid out of the assets attributed to each series of securities of the Fund, which reduces the return you may receive.

Sun Life Milestone 2030 Fund

Fees and expenses payable to or in connection with the Independent Review Committee ("IRC") are allocated to the fund and series to which they apply in a manner that, in the Manager's view, is considered fair and reasonable. For the purpose of allocating IRC costs across the Funds, the Manager distinguishes between two categories of Funds: Funds that are structured as fund of funds and Funds that hold direct investments. The Manager has determined that, based on the complexity of the issues to be reviewed by the IRC for the Funds in each category, it is appropriate for the Funds that are structured as fund of funds to be allocated a lesser proportion of IRC costs than Funds that hold direct investments. The Manager first attributes IRC costs to each such category of Funds, and then allocates such costs equally between the Funds in each category. The amounts of these charges are disclosed in the line item "Independent review committee fees" in the Fund's Statements of Comprehensive Income (Loss).

Net asset value per security (\$) ⁽¹⁾	14.57	14.60	13.96	16.11	16.66	15.41

⁽¹⁾ This information is provided as at December 31 of the period shown, except for the most recent semi-annual period, which is at June 30, 2024.

⁽²⁾ Management expense ratio is based on total expenses (excluding broker commissions and other portfolio transaction costs) including the Fund's allocated percentage of Fund-on-Funds' expenses for the stated period and is expressed as an annualized percentage of daily average Net Asset Value during the period.

⁽³⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average Net Asset Value during the period.

⁽⁴⁾ The Fund's portfolio turnover ratio indicates how actively the Fund's portfolio manager manages its portfolio investments. A portfolio turnover ratio of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a Fund's portfolio turnover ratio in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high portfolio turnover rate and the performance of the Fund.

Management Fees

The maximum annual management fee paid by the Fund is a percentage of the average daily net asset value of each series of securities of the Fund exclusive of any applicable taxes and operating expenses, which is accrued daily and is paid to the Manager monthly in arrears. Management fees pay for portfolio and investment advisory services, oversight of any service providers, marketing and promotional activities, arranging for the distribution and sale of securities of the Fund, general administration of Fund operations and sales and trailing commissions paid to dealers.

The percentages and major services paid for out of the management fees are set out below:

	Maximum Annual Management Fee Rate (%)	As a Percentage of Management Fees	
		Dealer Compensation (%) ⁽¹⁾	General Administration, Investment Advice and Profit (%)
Series A Securities	1.80	48	52

⁽¹⁾ Includes sales and trailing commissions.
